## HEART FAILURE CLINIC

The Heart Failure Clinic is a comprehensive program. Our goal is to combine inpatient, outpatient and home care services to optimize your quality of life. We also work with you to help you learn the tools you need to help manage your disease.

We will work with you to manage your care with a team that includes:

- Board-certified cardiologist
- Nurse practitioners
- Registered dieticians
- Social workers

### Services

- Education and counseling
- Medication monitoring and adjustment: Includes office visits and phone consultations with a nurse to review your medications and their effects on your quality of life
- Cardiology evaluation: For patients who require a cardiologist's evaluation for diagnostic testing, specialized interventions, treatment of symptoms, and management of complications such as arrhythmias
